## **Age Range**

3-7 years

## **Age Range Information**

5 to 18 years

## **SEL Skills targeted**

Self-management

## **Scales and Subscales**

4 scales:

Behaviour Regulation Index

Emotion Regulation Index

Cognitive Regulation Index

Global Executive Composite

9 subscales:

Task monitor

Shift

Working memory

Self-monitor

Initiate

Organization of materials

Emotional control

Inhibit

Plan/organize

63 items in total

3 validity scales:

Inconsistency

Negativity

Infrequency

## **Sources of information**

Child, Parent, Teacher

## **Formats for administration**

Direct assessment

## **Administration**

10 minutes

## **Scoring**

Manual, Electronic

## Psychometric Properties

Original English version psychometric properties:

Reliability: 0.71 – 0.98 ( $\alpha$ ); interrater 0.36 – 0.62; test-retest 0.72 – 0.82

Validity: item-total correlations 0.44 – 0.83; intercorrelations 0.41 – 0.88; measure of model fit 0.95 – 0.99

## Training

Test user accreditation; relevant qualifications/experience.

## Strengths and Weaknesses

Strengths: Provides a link between executive function and social-emotional control.

Efficient, comprehensive, and consistent with current models as its predecessor, the BRIEF.

Improved internal structure, with scales supported by factor analysis and three indexes consistent with widely accepted theory: Behaviour Regulation, Emotion Regulation, and Cognitive Regulation.

Clinical data provide support for evidence-based assessment and interpretation of clinical profiles.

Reliable change statistics make it easy to measure the significance of a change in scores over time.
