- Danish translation (DK):

<https://www.hogrefe.com/dk/shop/social-emotional-assessment-evaluation-measure.html>

Author: N. Madsen Sjö, & S. Kreiner.

Publisher: Hogrefe Psykologisk Forlag

Age Range

0-3 years, 3-7 years

Age Range Information

2-17 months, 18-35 months, 3 years until the start of school age

SEL Skills targeted

Relationship skills, Social awareness, Self-awareness, Self-management, Social and emotional development

Scales and Subscales

Included items based on age interval.

Scored across 10 domains.

Each interval assesses 10 child benchmarks critical to social-emotional competence, including empathy, adaptive skills, self-image, emotional responses, and healthy interactions with others.

Two indices: Empathy (EM) and Self-regulation and cooperation (SESAM) are calculated for each age interval.

Sources of information

Parent, Teacher

Formats for administration

Questionnaire

Administration

Individual

Approximately 10 minutes

Scoring

Manual

Psychometric Properties

US norms are based on 2201 filled-in forms.

Danish norms are available for the Educator form (N=9827). Average test-retest reliabilities from 0,62 to 0,84 across indices by age
