Scoring

Manual

Psychometric Properties

Validity of ASQ-3 has been evaluated extensively.

Concurrent validity ranged from 74% for the 42-month ASQ-3 questionnaire to 100% for the 2-month and 54-month questionnaires, with 86% overall agreement.

Sensitivity ranged from 75% for the 6-month questionnaire to 100% for the 4-month, 14-month, 54-month, and 60-month questionnaires, with 86% overall agreement.

The ability of ASQ-3 to correctly identify typically developing children, ranged from 70% for the 14-month questionnaire to 100% for the 2-month, 16-month, and 54-month questionnaires, with 85% overall agreement.

Training

Training available

Strengths and Weaknesses

Cited by several articles as an accurate, cost-effective, and parent-friendly instrument for screening and monitoring of young children.

Other Relevant Information

The ASQ has been translated into several languages, such as Spanish, French, Dutch, Chinese, Norwegian, Hindi, Persian, and Turkish. Furthermore, the number of international studies on its psychometric properties in diverse cultural environments is increasing (e. g., Australia, Brazil, Canada, Chile, China, Denmark, Ecuador, France, Ghana, India, Iran, Korea, Lebanon, Netherland, Norway, Republic of Macedonia, Spain, Taiwan, Thailand, Turkey).

Although no published versions are available in all listed languages, the ASQ is licensed; please check the available languages here: [Translations-of-ASQ_10.2020 \(agesandstages.com\)](https://agesandstages.com)

Studies on ASQ-3 are currently being conducted in the United States, Canada, and other countries.
